

CONSENT TO PARTICIPATE IN USER INTERFACE TESTING SESSION

Low Fidelity Prototype

You are asked to participate in a user interface testing session conducted by Shyam Vijayakumar, Kumar Garapaty, Paul Im, Cynthia Hsu and Wenda Zhao from the UC Berkeley undergraduate course CS 160. Your participation in this study is entirely voluntary. Please read the information below and ask questions about anything you do not understand, before deciding whether or not to participate.

- **PURPOSE OF THE STUDY**

The purpose of the testing session is to understand the flaws of a user interface prototype that is in its beginning stages. This means that it has not yet been implemented, but it is simply a paper prototype.

- **PROCEDURES**

If you volunteer to participate in this study, you will be asked to do the following things:

1. Interact with a user interface that consists of several index cards.
2. Inform the testers of any flaws that are apparent or any difficulties in general.

- **CONFIDENTIALITY**

Your identity and results of the testing session will be kept confidential.

- **PARTICIPATION AND WITHDRAWAL**

You can choose whether or not to participate in this testing session. You can refuse to answer any questions.

I understand the procedures described above. My questions have been answered to my satisfaction, and I agree to participate in this study.
